Welcome to the 1st African Conference on Precision Agriculture (AfCPA).

Below are lists of oral and poster presentations originating from your conference site. The list of on demand presentations were selected to be recorded in advance. A selection of these recordings are listed on your local conference agenda, but all on demand video content is available to conference registrants from the website.

**LOCAL PRESENTATIONS/POSTERS & ON DEMAND CONTENT**

Maximisation de l'efficience d'utilisation de l'azote par la tomate (Solanum lycopersicum L.) sur les ferrasols au Sud du Togo / Mouhamadou Lare

Tomato yield and economic performance under organic and mineral fertilizer applications in coastal Togo / Jean M Sogbedji

La fertilité indigène du sol : un élément catalyseur de l'agriculture de précision / Komlan Laurent William

détermination du bilan minéral partiel des exploitations agricoles à base du coton à l'aide du modèle NUTMON / Komlan Akantetou

Gestion strategique des nutriments pour l'amélioration du rendement et de la profitabilite économique du gombo (Abelmoschus esculentus L.) Sur les sols ferraltiques au Sud Togo / Kossi Koudjega

Soil fertility mapping of Dry savannah zone of Togo / Komla K Ganyo

Determining Nutrients rates for Maize, Rice, Cotton, and Tomato in Dry Savannah zone of Togo based on site specific nutrient management approach / Kossi Koudjega

Performance agronomique et économique de différentes stratégies de gestion de la fertilité du sol sous culture de soja (Glycine max L. Merril) dans la zone littorale du Togo. / Kokouvi M Amouzouvi

**ON DEMAND CONTENT - RECORDED**

Implementation of Proximal Soil Sensing, Data Fusion and Machine Learning to Improve Phosphorus Management at a Field Scale / Abdelkrim Lachgar

Nutrient management tailored to smallholder agriculture enhances productivity and sustainability / Pauline Chivenge / Pauline Chivenge

A precision irrigation app for smart water management by farmers / Aziz Abouabdillah

Monitoring irrigation water use at large scale irrigated areas using remote sensing in water scarce environment / Mohamed Hakim Kharrou

Mechanisation of smallholders in Zambia by agrodealer development / Sven Peets

A review on Sensor based robotics agriculture: Improving traditional Agriculture Practices / Sachin C Karad

LiDAR-based soybean crop segmentation for autonomous navigation / Vitor A Higuti

Estimating soil organic carbon from cell phone images / Asim Biswas

Cashew Trees Detection and Yield Analysis using UAV-based Map / Thierry Roger Bayala

Estimating greensnap yield damage with canopy reflectance: a case study / Gabriel Dias Paiao

Market Acceptance and Willingness to Pay for Drone Technology in the Application of Pesticide for the Control of Fall Armyworm / Selorm Omega

Spectral assessment of chickpea morpho-physiological traits from space, air and ground / Ittai Herrmann

Development of Lodging Direction Determination System Using Image Processing / Yuta Arai

Monitoring Corn (Zea mays) Yield using Sentinel-2 and Machine Learning for Precision Agriculture Applications / Ahmed Kayad

Excellence in Agronomy 2030: A new CGIAR-wide initiative to deliver agronomy solutions at scale / Bernard Vanlauwe
